# **The College Cost Crunch: A State-by-State Analysis of Rising Tuition and Student Debt**

Federal student aid has not kept pace with the rising cost of attending college. As a consequence, students and parents have been forced to rely more heavily on loans to finance higher education. Now, with interest rates rising by nearly two percentage points, paying off student loans will become even more difficult. The prospect of high student loan debt can deter qualified students from pursuing or completing a college education. And for those who do graduate from college, studies show that increasing student debt is affecting professional and personal decisions, such as what career to pursue or when to buy a home. If America is to remain a land of opportunity, we must ensure that college is affordable for all and that the pursuit of higher education is determined by one's ability and hard work, not by one's bank account.

## ***College Education: More Important, More Expensive***

A college education is more important than ever in ensuring success in our increasingly competitive economy. It improves one's chances of being employed, having higher earnings, and entering the middle class. People with a bachelor's degree earn over 62 percent more on average than those with only a high school diploma. Over a lifetime, the gap in earning potential between a person with a high school diploma and a bachelor's degree is more than \$1 million. (College Board, 2005)

But while a college education has become more important to economic success, the cost has become an even greater barrier to getting a degree. The cost of attending a public four-year college increased 32 percent between the 2000-2001 and 2004-2005 school years. The cost of attending a private four-year college also has risen considerably – a 21 percent increase – and has reached nearly \$26,500 a year. (U.S. Department of Education, Digest of Education Statistics, 2001 and 2005) Over the same period, median family income increased less than six percent. (U.S. Census Bureau, Historical Income Tables) After financial aid is taken into account, 28 percent of the average family income is required to pay for annual college expenses at a public four-year college. (The National Center for Public Policy and Higher Education, Measuring Up 2004)

## ***Paying for College: A Shift from Grants to Loans***

The federal government has long recognized the personal and public benefits of making college affordable. The federal Pell Grant program, which is the nation's largest need-based grant program, has proven to be indispensable for millions of students who might not otherwise have had the financial resources to pursue a college degree. But the maximum federal Pell Grant award has not kept pace with the rising cost of attending college. While the maximum Pell Grant covered 51 percent of the cost of tuition, fees, room and board at a public four-year college during the 1986-1987 school year, it

covered only 35 percent of those costs in 2004-2005. (Analysis of Department of Education data)

Without adequate federal grants, students and their parents have had to rely increasingly on student loans to finance their college educations. More students are borrowing, and borrowing larger amounts, than ever before. The percentage of undergraduates at four-year colleges taking out loans has risen to over 60 percent, and the average amount of federal student loan debt upon graduation has increased from \$8,946 in 1992-1993 to \$17,400 in 2003-2004. When private loans are factored in as well, average student loan debt in 2003-2004 was over \$19,000. (National Postsecondary Student Aid Study 1993 and 2004, National Center for Education Statistics)

While the amount of student loans has grown over time, the impact has been moderated in recent years by historically low interest rates. Students have minimized the effects of high debt by consolidating loans at low, fixed rates. But interest rates for Stafford loans have risen substantially over the past two years, increasing from 3.4 to 5.3 percent last year and will be rising again on July 1 – to 7.14 percent for outstanding loans and 6.8 percent on new loans. (Congressional Research Service) As a result, loan payments will be considerably higher for students taking out new loans and for those who did not consolidate their loans in recent years.

### ***Student Debt's Impact on Attending and Completing College***

Regrettably, the opportunity of a college education is not available to all qualified students. The high cost of attending college, combined with insufficient grant aid, can price students out of a college education. Even with student loans and work-study programs, students can be confronted with thousands of dollars of unmet financial need that they simply cannot afford to pay. After all aid, loans and work are taken into account, the lowest income students still face nearly \$5,800 in unmet need. (Business Higher Education Forum, 2005) Consequently, each year, more than 400,000 low- and moderate-income high school graduates who are fully prepared to attend a four-year college do not do so because of financial barriers. About 170,000 of these students will attend no college at all. (Advisory Committee on Student Finance Assistance, June 2002)

The need to take out student loans can also cause students to delay starting school, prevent them from attending a more expensive college, or prevent students who begin college from graduating. Students who attempt college but leave without a degree can become burdened with an unmanageable student loan debt. About 18 percent of people who leave school without completing a degree borrow more than \$20,000. (Nellie Mae Corporation, February 2003)

### ***Student Debt's Impact on Post-Graduate Decisions***

Large student debt also affects career and life decisions after graduation. A new study examined the burden of student loan debt on people who would like to pursue public service careers such as teaching and social work – careers that are low-paying yet essential to America's future and to the communities in which we live. It found that 23

percent of public college graduates and 38 percent of private college graduates would have an unmanageable level of student debt if they were to live on the salary of a starting teacher. The outlook is even bleaker for social work. Student debt would be unmanageable for 37 percent of public college graduates and 55 percent of private college graduates living on the salary of a starting social worker. (State PIRGs' Higher Education Project, April 2006)

The most recent National Student Loan Survey has found that student debt can affect other major life decisions. For the first time in fifteen years, the survey found that the probability of owning a home decreases as student debt levels increase. While student debt is not the primary determinant of home ownership, the survey found that an additional \$5,000 of debt reduces the probability of owning home by about one percent. The survey also measured the perceived impact of student loan debt and found that 30 percent of respondents said they delayed buying a car because of student loan debt, 21 percent said they delayed having children because of student loan debt, and 14 percent said they delayed getting married because of student loan debt. (Nellie Mae Corporation, February 2003)

### ***Budget Reconciliation: A Missed Opportunity to Expand College Affordability***

At the end of 2005, federal lawmakers were presented with a realistic opportunity to address college affordability. It was proposed that Congress could reduce excessive subsidies going to student loan lenders and use those savings to substantially increase need-based aid to all students eligible for Pell Grants. But the Republican-controlled Congress had other priorities. Instead of increasing grants to all Pell-eligible students, Republicans stripped \$12 billion from the student loan program and used it to offset more tax breaks for the wealthy instead of more aid for students. Only a very small amount of additional savings went to student aid. This new aid program is so restrictive that the Congressional Budget Office estimates that less than ten percent of Pell eligible students will receive additional grant aid this year. To make matters worse, in the same bill, Congress also increased interest rates for PLUS loans to parents, from the previously-scheduled fixed rate of 7.9 percent to 8.5 percent.

### ***A Need for a New Direction on College Affordability***

Democrats recognize that students and their families are struggling to cover the rising cost of college and are making college affordability a top priority. Specifically, Democrats propose to:

- **Cut student loan costs and make payments manageable.** Because interest rates on new Stafford loans are set to rise to a fixed 6.8 percent on July 1, current college students will eventually have higher monthly debt payments than graduates who were able to consolidate their student loans at low fixed rates in recent years. Democrats support efforts to make student loans affordable, such

as lowering interest rates or expanding options to limit loan payments to a specified percentage of the borrower's income.

- **Expand Pell Grants.** President Bush still has not followed through on his six-year-old campaign promise to increase the maximum Pell Grant to \$5,100. Under his budget proposal for Fiscal Year 2007, the maximum Pell Grant would remain at \$4,050 – where it has been frozen for the past four years, despite skyrocketing tuition and fees. Democrats are committed to raising the maximum Pell Grant award to \$5,100.
- **Make college tuition deductible from taxes.** The Republican-controlled Congress allowed a popular tax deduction for college tuition to expire at the end of 2005. In 2003, over 3.4 million Americans benefited from this tax deduction. Preliminary data from the Internal Revenue Service shows that in 2004, 4.7 million took advantage of the deduction, which allowed qualified taxpayers to deduct up to \$4,000 in tuition and fees from their taxable income. Republicans chose to include capital gains and dividends tax breaks – but not the college tuition tax deduction – in the tax reconciliation conference report approved earlier this year. Democrats support extending this tax deduction this year so taxpayers can benefit from it when filing their 2006 tax returns and have proposed increasing the deduction to \$12,000. Democrats also support expanding access to the Hope and Lifetime Learning tax credits for qualified postsecondary education expenses.

## **Examining How States Are Affected by Rising Tuition and Student Debt**

Rising tuition and student loan debt is a national problem. No state has escaped the college cost crunch. But individual states have been affected to different degrees. This report provides information on the college affordability problem in each state as well as how students and their families in each state would benefit from Democratic proposals. The following tables and individualized state reports provide information for each state on:

- The rising cost of college;
- The erosion of the value of the Pell Grant;
- The amount of student loan debt incurred by college graduates;
- The amount of family income needed to pay for college;
- The amount of savings if student loan interest rates were cut in half;
- The reduction in monthly costs if student loan payments were capped at 15 percent of a borrower's discretionary income;
- The increase in the average Pell Grant award and the number of students eligible if the maximum Pell Grant were increased to \$5,100; and
- The number of students and families who are likely to benefit from re-instituting the college tuition tax deduction, which expired at the end of 2005.

Calculations based on formula for current Income Contingent Repayment option in the Direct Loan Program (either 20% cap on income or income percentage factors); actual reduction in monthly payment resulting from Democratic proposal to cap payments at 15% of income might differ slightly from estimates provided. Democratic proposal also expands income contingent repayment option to all borrowers.

# **THE COLLEGE COST CRUNCH: STATE ANALYSES**

## A NEW DIRECTION FOR AMERICA

### Bush Republicans Take Us in the Wrong Direction, Alabama Students Pay the Price

Despite the critical need to boost affordable college opportunities for all Americans, the Republican-led Congress continues to put college even further out of reach for millions of students. Each year millions of hardworking American families and students continue to struggle to cover college costs. But five years of Republican policies have resulted in stagnant federal grant aid, increasing numbers of students and their families falling further into debt to finance a college education, and fewer options for college graduates.

**The Cost of College Has Soared.** Between the 2000-2001 and 2004-2005 school years, the cost of attendance at four-year public colleges in Alabama increased 34%, from \$7,338 to \$9,819 for tuition, fees, room and board. The cost of attendance at four-year private colleges in Alabama increased 23% from \$14,248 to \$17,520 for tuition, fees, room and board.<sup>1</sup>

**Median Family Incomes Have Remained Stagnant.** While public college costs have increased 34%, median family incomes in Alabama have increased only 3% since 2000.<sup>2</sup> After financial aid is taken into account, 27% of the average family income in Alabama is needed to pay for tuition at a four-year public college.<sup>3</sup>

**Federal Student Aid Has Eroded Over Time.** In Alabama the maximum Pell grant, which has remained at \$4,050 for the past four years, covered only 41% of the average public four-year college tuition, fees, room and board in 2004-2005 – down from 62% in 1986-1987.<sup>4</sup> In 1975-1976, 77% of federal aid going to students nationally was in the form of grants, and only 20% was loans. In 2004-2005, it was 70% loans, 20% grants.<sup>5</sup>

**Students Have Taken on More Debt to Pay for College.** More students are leaving college in debt. In 2004, nearly two-thirds of all four-year college graduates nationwide had loan debt, compared with less than one-third of graduates in 1993.<sup>6</sup> In Alabama, 62% of undergraduates took out loans to finance their college education.<sup>7</sup> The average student graduating from a four-year college in Alabama owed \$17,277 on graduation day in 2004.<sup>8</sup>

**Increased Debt Levels Are Impacting Students' Career and Life Choices.** Nationally, nearly a quarter of public four-year college graduates and over a third of private four-year college graduates have too much debt to manage on a starting teacher's salary.<sup>9</sup> Debt levels are also causing students to delay buying a home or a car and postpone marriage or having children.<sup>10</sup>

#### To Reverse these Trends, Democrats Propose a New Direction to Help Alabama Students.

- Democrats opposed recent Republican efforts to raise student loan interest rates, and have called for a reduction in interest rates. If interest rates were cut in half, Alabama college graduates would save \$3,455 over the ten-year life of their loans.<sup>11</sup>
- Democrats have also called for debt relief for college graduates with excessive loan burdens. If federal student loan payments were capped at 15% of a borrower's discretionary income, starting teachers in Alabama earning \$30,973,<sup>12</sup> who graduate with the state average student loan debt of \$17,277,<sup>13</sup> would see a reduction of about \$50,<sup>14</sup> or 25%, in their monthly loan payments. For individuals who continue in public service careers for 10 years, student loan debt would be forgiven.
- Democrats have called for increasing the maximum Pell Grant from \$4,050 to \$5,100. With an increase in the Pell Grant, 6,305 more Alabama college students would be eligible for \$91,631,948 in additional need-based grant aid.<sup>15</sup> The average grant in Alabama would increase by \$681, from \$2,556 to \$3,237.<sup>16</sup>
- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 39,157 Alabama students and families benefited from the tuition tax deduction.<sup>17</sup>

## A NEW DIRECTION FOR AMERICA

### Bush Republicans Take Us in the Wrong Direction, Alaska Students Pay the Price

Despite the critical need to boost affordable college opportunities for all Americans, the Republican-led Congress continues to put college even further out of reach for millions of students. Each year millions of hardworking American families and students continue to struggle to cover college costs. But five years of Republican policies have resulted in stagnant federal grant aid, increasing numbers of students and their families falling further into debt to finance a college education, and fewer options for college graduates.

**The Cost of College Has Soared.** Between the 2000-2001 and 2004-2005 school years, the cost of attendance at four-year public colleges in Alaska increased 18%, from \$8,386 to \$9,936 for tuition, fees, room and board. The cost of attendance at four-year private colleges in Alaska increased 49% from \$14,378 to \$21,423 for tuition, fees, room and board.<sup>1</sup>

**Median Family Incomes Have Remained Stagnant.** While public college costs have increased 18%, median family incomes in Alaska have increased only 4% since 2000.<sup>2</sup> After financial aid is taken into account, 21% of the average family income in Alaska is needed to pay for tuition at a four-year public college.<sup>3</sup>

**Federal Student Aid Has Eroded Over Time.** In Alaska the maximum Pell grant, which has remained at \$4,050 for the past four years, covered only 41% of the average public four-year college tuition, fees, room and board in 2004-2005 – down from 53% in 1986-1987.<sup>4</sup> In 1975-1976, 77% of federal aid going to students nationally was in the form of grants, and only 20% was loans. In 2004-2005, it was 70% loans, 20% grants.<sup>5</sup>

**Students Have Taken on More Debt to Pay for College.** More students are leaving college in debt. In 2004, nearly two-thirds of all four-year college graduates nationwide had loan debt, compared with less than one-third of graduates in 1993.<sup>6</sup> In Alaska, 53% of undergraduates took out loans to finance their college education.<sup>7</sup> The average student graduating from a four-year college in Alaska owed \$12,948 on graduation day in 2004.<sup>8</sup>

**Increased Debt Levels Are Impacting Students' Career and Life Choices.** Nationally, nearly a quarter of public four-year college graduates and over a third of private four-year college graduates have too much debt to manage on a starting teacher's salary.<sup>9</sup> Debt levels are also causing students to delay buying a home or a car and postpone marriage or having children.<sup>10</sup>

#### To Reverse these Trends, Democrats Propose a New Direction to Help Alaska Students.

- Democrats opposed recent Republican efforts to raise student loan interest rates, and have called for a reduction in interest rates. If interest rates were cut in half, Alaska college graduates would save \$2,588 over the ten-year life of their loans.<sup>11</sup>
- Democrats have also called for debt relief for college graduates with excessive loan burdens. If federal student loan payments were capped at 15% of a borrower's discretionary income, starting teachers in Alaska earning \$40,027,<sup>12</sup> who graduate with the state average student loan debt of \$12,948,<sup>13</sup> would see a reduction of about \$22,<sup>14</sup> or 15%, in their monthly loan payments. For individuals who continue in public service careers for 10 years, student loan debt would be forgiven.
- Democrats have called for increasing the maximum Pell Grant from \$4,050 to \$5,100. With an increase in the Pell Grant, 293 more Alaska college students would be eligible for \$3,719,407 in additional need-based grant aid.<sup>15</sup> The average grant in Alaska would increase by \$595, from \$2,235 to \$2,830.<sup>16</sup>
- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 13,636 Alaska students and families benefited from the tuition tax deduction.<sup>17</sup>

**Median Family Incomes Have Remained Stagnant.** While college costs have increased across the nation, median family incomes in District of Columbia have increased only 5% since 2000.<sup>2</sup>

**Federal Student Aid Has Eroded Over Time.** In 1975-1976, 77% of federal aid going to students nationally was in the form of grants, and only 20% was loans. In 2004-2005, it was 70% loans, 20% grants.<sup>5</sup>

**Students Have Taken on More Debt to Pay for College.** More students are leaving college in debt. In 2004, nearly two-thirds of all four-year college graduates nationwide had loan debt, compared with less than one-third of graduates in 1993.<sup>6</sup> In District of Columbia, 53% of undergraduates took out loans to finance their college education.<sup>7</sup> The average student graduating from a four-year college in District of Columbia owed \$21,675 on graduation day in 2004.<sup>8</sup>

**Increased Debt Levels Are Impacting Students' Career and Life Choices.** Nationally, nearly a quarter of public four-year college graduates and over a third of private four-year college graduates have too much debt to manage on a starting teacher's salary.<sup>9</sup> Debt levels are also causing students to delay buying a home or a car and postpone marriage or having children.<sup>10</sup>

#### To Reverse these Trends, Democrats Propose a New Direction to Help District of Columbia Students.

- Democrats opposed recent Republican efforts to raise student loan interest rates, and have called for a reduction in interest rates. If interest rates were cut in half, District of Columbia college graduates would save \$4,334 over the ten-year life of their loans.<sup>11</sup>
- Democrats have also called for debt relief for college graduates with excessive loan burdens. If federal student loan payments were capped at 15% of a borrower's discretionary income, starting teachers in District of Columbia earning \$38,566,<sup>12</sup> who graduate with the state average student loan debt of \$21,675,<sup>13</sup> would see a reduction of about \$42,<sup>14</sup> or 17%, in their monthly loan payments. For individuals who continue in public service careers for 10 years, student loan debt would be forgiven.
- Democrats have called for increasing the maximum Pell Grant from \$4,050 to \$5,100. With an increase in the Pell Grant, 1,030 more District of Columbia college students would be eligible for \$13,639,167 in additional need-based grant aid.<sup>15</sup> The average grant in District of Columbia would increase by \$621, from \$2,331 to \$2,952.<sup>16</sup>
- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 8,518 District of Columbia students and families benefited from the tuition tax deduction.<sup>17</sup>

## A NEW DIRECTION FOR AMERICA

### Bush Republicans Take Us in the Wrong Direction, Florida Students Pay the Price

Despite the critical need to boost affordable college opportunities for all Americans, the Republican-led Congress continues to put college even further out of reach for millions of students. Each year millions of hardworking American families and students continue to struggle to cover college costs. But five years of Republican policies have resulted in stagnant federal grant aid, increasing numbers of students and their families falling further into debt to finance a college education, and fewer options for college graduates.

**The Cost of College Has Soared.** Between the 2000-2001 and 2004-2005 school years, the cost of attendance at four-year public colleges in Florida increased 18%, from \$7,944 to \$9,335 for tuition, fees, room and board. The cost of attendance at four-year private colleges in Florida increased 20% from \$19,800 to \$23,793 for tuition, fees, room and board.<sup>1</sup>

**Median Family Incomes Have Remained Stagnant.** While public college costs have increased 18%, median family incomes in Florida have increased only 4% since 2000.<sup>2</sup> After financial aid is taken into account, 25% of the average family income in Florida is needed to pay for tuition at a four-year public college.<sup>3</sup>

**Federal Student Aid Has Eroded Over Time.** In Florida the maximum Pell grant, which has remained at \$4,050 for the past four years, covered only 43% of the average public four-year college tuition, fees, room and board in 2004-2005 – down from 54% in 1986-1987.<sup>4</sup> In 1975-1976, 77% of federal aid going to students nationally was in the form of grants, and only 20% was loans. - Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 37,364 Iowa students and families benefited from the tuition tax deduction.<sup>17</sup>

## A NEW DIRECTION FOR AMERICA

### Bush Republicans Take Us in the Wrong Direction, Kansas Students Pay the Price

Despite the critical need to boost affordable college opportunities for all Americans, the Republican-led Congress continues to put college even further out of reach for millions of students. Each year millions of hardworking American families and students continue to struggle to cover college costs. But five years of Republican policies have resulted in stagnant federal grant aid, increasing numbers of students and their families falling further into debt to finance a college education, and fewer options for college graduates.

**The Cost of College Has Soared.** Between the 2000-2001 and 2004-2005 school years, the cost of attendance at four-year public colleges in Kansas increased 41%, from \$6,650 to \$9,397 for tuition, fees, room and board. The cost of attendance at four-year private colleges in Kansas increased 26% from \$15,627 to \$19,736 for tuition, fees, room and board.<sup>1</sup>

**Median Family Incomes Have Remained Stagnant.** While public college costs have increased 41%, median family incomes in Kansas have increased less than 1% since 2000.<sup>2</sup> After financial aid is taken into account, 23% of the average family income in Kansas is needed to pay for tuition at a four-year public college.<sup>3</sup>

**Federal Student Aid Has Eroded Over Time.** In Kansas the maximum Pell grant, which has remained at \$4,050 for the past four years, covered only 43% of the average public four-year college tuition, fees, room and board in 2004-2005 – down from 60% in 1986-1987.<sup>4</sup> In 1975-1976, 77% of federal aid going to students nationally was in the form of grants, and only 20% was loans. In 2004-2005, it was 70% loans, 20% grants.<sup>5</sup>

**Students Have Taken on More Debt to Pay for College.** More students are leaving college in debt. In 2004, nearly two-thirds of all four-year college graduates nationwide had loan debt, compared with less than one-third of graduates in 1993.<sup>6</sup> In Kansas, 69% of undergraduates took out loans to finance their college education.<sup>7</sup> The average student graduating from a four-year college in Kansas owed \$16,029 on graduation day in 2004.<sup>8</sup>

**Increased Debt Levels Are Impacting Students' Career and Life Choices.** Nationally, nearly a quarter of public four-year college graduates and over a third of private four-year college graduates have too much debt to manage on a starting teacher's salary.<sup>9</sup> Debt levels are also causing students to delay buying a home or a car and postpone marriage or having children.<sup>10</sup>

#### To Reverse these Trends, Democrats Propose a New Direction to Help Kansas Students.

- Democrats opposed recent Republican efforts to raise student loan interest rates, and have called for a reduction in interest rates. If interest rates were cut in half, Kansas college graduates would save \$3,205 over the ten-year life of their loans.<sup>11</sup>
- Democrats have also called for debt relief for college graduates with excessive loan burdens. If federal student loan payments were capped at 15% of a borrower's discretionary income, starting teachers in Kansas earning \$28,530,<sup>12</sup> who graduate with the state average student loan debt of \$16,029,<sup>13</sup> would see a reduction of about \$51,<sup>14</sup> or 28%, in their monthly loan payments. For individuals who continue in public service careers for 10 years, student loan debt would be forgiven.
- Democrats have called for increasing the maximum Pell Grant from \$4,050 to \$5,100. With an increase in the Pell Grant, 3,177 more Kansas college students would be eligible for \$41,889,132 in additional need-based grant aid.<sup>15</sup> The average grant in Kansas would increase by \$618, from \$2,320 to \$2,938.<sup>16</sup>
- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 39,948 Kansas students and families benefited from the tuition tax deduction.<sup>17</sup>

The cost of attendance at four-year private colleges in Minnesota increased 20% from \$21,556 to \$25,946 for tuition, fees, room and board.<sup>1</sup>

**Median Family Incomes Have Remained Stagnant.** While public college costs have increased 47%, median family incomes in Minnesota have increased only 3% since 2000.<sup>2</sup> After financial aid is taken into account, 23% of the average family income in Minnesota is needed to pay for tuition at a four-year public college.<sup>3</sup>

**Federal Student Aid Has Eroded Over Time.** In Minnesota the maximum Pell grant, which has remained at \$4,050 for the past four years, covered only 34% of the average public four-year college tuition, fees, room and board in 2004-2005 – down from 52% in 1986-1987.<sup>4</sup> In 1975-1976, 77% of federal aid going to students nationally was in the form of grants, and only 20% was loans. In 2004-2005, it was 70% loans, 20% grants.<sup>5</sup>

**Students Have Taken on More Debt to Pay for College.** More students are leaving college in debt. In 2004, nearly two-thirds of all four-year college graduates nationwide had loan debt, compared with less than one-third of graduates in 1993.<sup>6</sup> In Minnesota, 67% of undergraduates took out loans to finance their college education.<sup>7</sup> The average student graduating from a four-year college in Minnesota owed \$19,468 on graduation day in 2004.<sup>8</sup>

**Increased Debt Levels Are Impacting Students' Career and Life Choices.** Nationally, nearly a quarter of public four-year college graduates and over a third of private four-year college graduates have too much debt to manage on a starting teacher's salary.<sup>9</sup> Debt levels are also causing students to delay buying a home or a car and postpone marriage or having children.<sup>10</sup>

#### To Reverse these Trends, Democrats Propose a New Direction to Help Minnesota Students.

- Democrats opposed recent Republican efforts to raise student loan interest rates, and have called for a reduction in interest rates. If interest rates were cut in half, Minnesota college graduates would save \$3,892 over the ten-year life of their loans.<sup>11</sup>
- Democrats have also called for debt relief for college graduates with excessive loan burdens. If federal student loan payments were capped at 15% of a borrower's discretionary income, starting teachers in Minnesota earning \$30,772,<sup>12</sup> who graduate with the state average student loan debt of \$19,468,<sup>13</sup> would see a reduction of about \$57,<sup>14</sup> or 25%, in their monthly loan payments. For individuals who continue in public service careers for 10 years, student loan debt would be forgiven.
- Democrats have called for increasing the maximum Pell Grant from \$4,050 to \$5,100. With an increase in the Pell Grant, 4,685 more Minnesota college students would be eligible for \$59,514,223 in additional need-based grant aid.<sup>15</sup> The average grant in Minnesota would increase by \$595, from \$2,235 to \$2,830.<sup>16</sup>
- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 82,496 Minnesota students and families benefited from the tuition tax deduction.<sup>17</sup>

**Increased Debt Levels Are Impacting Students' Career and Life Choices.** Nationally, nearly a quarter of public four-year college graduates and over a third of private four-year college graduates have too much debt to manage on a starting teacher's salary.<sup>9</sup> Debt levels are also causing students to delay buying a home or a car and postpone marriage or having children.<sup>10</sup>

#### To Reverse these Trends, Democrats Propose a New Direction to Help New Jersey Students.

- Democrats opposed recent Republican efforts to raise student loan interest rates, and have called for a reduction in interest rates. If interest rates were cut in half, New Jersey college graduates would save \$3,289 over the ten-year life of their loans.<sup>11</sup>
- Democrats have also called for debt relief for college graduates with excessive loan burdens. If federal student loan payments were capped at 15% of a borrower's discretionary income, starting teachers in New Jersey earning \$37,061,<sup>12</sup> who graduate with the state average student loan debt of \$16,450,<sup>13</sup> would see a reduction of about \$35,<sup>14</sup> or 18%, in their monthly loan payments. For individuals who continue in public service careers for 10 years, student loan debt would be forgiven.
- Democrats have called for increasing the maximum Pell Grant from \$4,050 to \$5,100. With an increase in the Pell Grant, 6,161 more New Jersey college students would be eligible for \$86,287,630 in additional need-based grant aid.<sup>15</sup> The average grant in New Jersey would increase by \$656, from \$2,464 to \$3,120.<sup>16</sup>
- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 121,775 New Jersey students and families benefited from the tuition tax deduction.<sup>17</sup>

## A NEW DIRECTION FOR AMERICA

### Bush Republicans Take Us in the Wrong Direction, New Mexico Students Pay the Price

Despite the critical need to boost affordable college opportunities for all Americans, the Republican-led Congress continues to put college even further out of reach for millions of students. Each year millions of hardworking American families and students continue to struggle to cover college costs. But five years of Republican policies have resulted in stagnant federal grant aid, increasing numbers of students and their families falling further into debt to finance a college education, and fewer options for college graduates.

**The Cost of College Has Soared.** Between the 2000-2001 and 2004-2005 school years, the cost of attendance at four-year public colleges in New Mexico increased 22%, from \$7,085 to \$8,675 for tuition, fees, room and board. The cost of attendance at four-year private colleges in New Mexico increased 2% from \$18,985 to \$19,304 for tuition, fees, room and board.<sup>1</sup>

**Median Family Incomes Have Remained Stagnant.** While public college costs have increased 22%, median family incomes in New Mexico have increased only 12% since 2000.<sup>2</sup> After financial aid is taken into account, 27% of the average family income in New Mexico is needed to pay for tuition at a four-year public college.<sup>3</sup>

**Federal Student Aid Has Eroded Over Time.** In New Mexico the maximum Pell grant, which has remained at \$4,050 for the past four years, covered only 47% of the average public four-year college tuition, fees, room and board in 2004-2005 – down from 58% in 1986-1987.<sup>4</sup> In 1975-1976, 77% of federal aid going to students nationally was in the form of grants, and only 20% was loans. In 2004-2005, it was 70% loans, 20% grants.<sup>5</sup>

**Students Have Taken on More Debt to Pay for College.** More students are leaving college in debt. In 2004, nearly two-thirds of all four-year college graduates nationwide had loan debt, compared with less than one-third of graduates in 1993.<sup>6</sup> In New Mexico, 51% of undergraduates took out loans to finance their college education.<sup>7</sup> The average student graduating from a four-year college in New Mexico owed \$12,746 on graduation day in 2004.<sup>8</sup>

**Increased Debt Levels Are Impacting Students' Career and Life Choices.** Nationally, nearly a quarter of public four-year college graduates and over a third of private four-year college graduates have too much debt to manage on a starting teacher's salary.<sup>9</sup> Debt levels are also causing students to delay buying a home or a car and postpone marriage or having children.<sup>10</sup>

#### To Reverse these Trends, Democrats Propose a New Direction to Help New Mexico Students.

- Democrats opposed recent Republican efforts to raise student loan interest rates, and have called for a reduction in interest rates. If interest rates were cut in half, New Mexico college graduates would save \$2,549 over the ten-year life of their loans.<sup>11</sup>
- Democrats have also called for debt relief for college graduates with excessive loan burdens. If federal student loan payments were capped at 15% of a borrower's discretionary income, starting teachers in New Mexico earning \$31,920,<sup>12</sup> who graduate with the state average student loan debt of \$12,746,<sup>13</sup> would see a reduction of about \$35,<sup>14</sup> or 24%, in their monthly loan payments. For individuals who continue in public service careers for 10 years, student loan debt would be forgiven.
- Democrats have called for increasing the maximum Pell Grant from \$4,050 to \$5,100. With an increase in the Pell Grant, 2,560 more New Mexico college students would be eligible for \$34,982,257 in additional need-based grant aid.<sup>15</sup> The average grant in New Mexico would increase by \$641, from \$2,404 to \$3,045.<sup>16</sup>
- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 25,691 New Mexico students and families benefited from the tuition tax deduction.<sup>17</sup>

- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 53,264 Oregon students and families benefited from the tuition tax deduction.<sup>17</sup>

## A NEW DIRECTION FOR AMERICA

### Bush Republicans Take Us in the Wrong Direction, Pennsylvania Students Pay the Price

Despite the critical need to boost affordable college opportunities for all Americans, the Republican-led Congress continues to put college even further out of reach for millions of students. Each year millions of hardworking American families and students continue to struggle to cover college costs. But five years of Republican policies have resulted in stagnant federal grant aid, increasing numbers of students and their families falling further into debt to finance a college education, and fewer options for college graduates.

**The Cost of College Has Soared.** Between the 2000-2001 and 2004-2005 school years, the cost of attendance at four-year public colleges in Pennsylvania increased 33%, from \$11,087 to \$14,771 for tuition, fees, room and board. The cost of attendance at four-year private colleges in Pennsylvania increased 24% from \$24,779 to \$30,637 for tuition, fees, room and board.<sup>1</sup>

**Median Family Incomes Have Remained Stagnant.** While public college costs have increased 33%, median family incomes in Pennsylvania have increased only 5% since 2000.<sup>2</sup> After financial aid is taken into account, 35% of the average family income in Pennsylvania is needed to pay for tuition at a four-year public college.<sup>3</sup>

**Federal Student Aid Has Eroded Over Time.** In Pennsylvania the maximum Pell grant, which has remained at \$4,050 for the past four years, covered only 27% of the average public four-year college tuition, fees, room and board in 2004-2005 – down from 41% in 1986-1987.<sup>4</sup> In 1975-1976, 77% of federal aid going to students nationally was in the form of grants, and only 20% was loans. In 2004-2005, it was 70% loans, 20% grants.<sup>5</sup>

**Students Have Taken on More Debt to Pay for College.** More students are leaving college in debt. In 2004, nearly two-thirds of all four-year college graduates nationwide had loan debt, compared with less than one-third of graduates in 1993.<sup>6</sup> In Pennsylvania, 72% of undergraduates took out loans to finance their college education.<sup>7</sup> The average student graduating from a four-year college in Pennsylvania owed \$19,866 on graduation day in 2004.<sup>8</sup>

**Increased Debt Levels Are Impacting Students' Career and Life Choices.** Nationally, nearly a quarter of public four-year college graduates and over a third of private four-year college graduates have too much debt to manage on a starting teacher's salary.<sup>9</sup> Debt levels are also causing students to delay buying a home or a car and postpone marriage or having children.<sup>10</sup>

#### To Reverse these Trends, Democrats Propose a New Direction to Help Pennsylvania Students.

- Democrats opposed recent Republican efforts to raise student loan interest rates, and have called for a reduction in interest rates. If interest rates were cut in half, Pennsylvania college graduates would save \$3,972 over the ten-year life of their loans.<sup>11</sup>
- Democrats have also called for debt relief for college graduates with excessive loan burdens. If federal student loan payments were capped at 15% of a borrower's discretionary income, starting teachers in Pennsylvania earning \$34,140,<sup>12</sup> who graduate with the state average student loan debt of \$19,866,<sup>13</sup> would see a reduction of about \$50,<sup>14</sup> or 22%, in their monthly loan payments. For individuals who continue in public service careers for 10 years, student loan debt would be forgiven.
- Democrats have called for increasing the maximum Pell Grant from \$4,050 to \$5,100. With an increase in the Pell Grant, 14,255 more Pennsylvania college students would be eligible for \$159,320,010 in additional need-based grant aid.<sup>15</sup> The average grant in Pennsylvania would increase by \$637, from \$2,388 to \$3,025.<sup>16</sup>
- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 147,850 Pennsylvania students and families benefited from the tuition tax deduction.<sup>17</sup>

The cost of attendance at four-year private colleges in Vermont also increased 22%, from \$22,312 to \$27,261 for tuition, fees, room and board.<sup>1</sup>

**Median Family Incomes Have Remained Stagnant.** While public college costs have increased 22%, median family incomes in Vermont have increased only 20% since 2000.<sup>2</sup> After financial aid is taken into account, 41% of the average family income in Vermont is needed to pay for tuition at a four-year public college.<sup>3</sup>

**Federal Student Aid Has Eroded Over Time.** In Vermont the maximum Pell grant, which has remained at \$4,050 for the past four years, covered only 26% of the average public four-year college tuition, fees, room and board in 2004-2005 – down from 30% in 1986-1987.<sup>4</sup> In 1975-1976, 77% of federal aid going to students nationally was in the form of grants, and only 20% was loans. In 2004-2005, it was 70% loans, 20% grants.<sup>5</sup>

**Students Have Taken on More Debt to Pay for College.** More students are leaving college in debt. In 2004, nearly two-thirds of all four-year college graduates nationwide had loan debt, compared with less than one-third of graduates in 1993.<sup>6</sup> In Vermont, 69% of undergraduates took out loans to finance their college education.<sup>7</sup> The average student graduating from a four-year college in Vermont owed \$20,604 on graduation day in 2004.<sup>8</sup>

**Increased Debt Levels Are Impacting Students' Career and Life Choices.** Nationally, nearly a quarter of public four-year college graduates and over a third of private four-year college graduates have too much debt to manage on a starting teacher's salary.<sup>9</sup> Debt levels are also causing students to delay buying a home or a car and postpone marriage or having children.<sup>10</sup>

#### To Reverse these Trends, Democrats Propose a New Direction to Help Vermont Students.

- Democrats opposed recent Republican efforts to raise student loan interest rates, and have called for a reduction in interest rates. If interest rates were cut in half, Vermont college graduates would save \$4,120 over the ten-year life of their loans.<sup>11</sup>
- Democrats have also called for debt relief for college graduates with excessive loan burdens. If federal student loan payments were capped at 15% of a borrower's discretionary income, starting teachers in Vermont earning \$25,819,<sup>12</sup> who graduate with the state average student loan debt of \$20,604,<sup>13</sup> would see a reduction of about \$75,<sup>14</sup> or 32%, in their monthly loan payments. For individuals who continue in public service careers for 10 years, student loan debt would be forgiven.
- Democrats have called for increasing the maximum Pell Grant from \$4,050 to \$5,100. With an increase in the Pell Grant, 556 more Vermont college students would be eligible for \$7,065,304 in additional need-based grant aid.<sup>15</sup> The average grant in Vermont would increase by \$595, from \$2,232 to \$2,827.<sup>16</sup>
- Democrats have also called for an extension of the college tuition tax deduction, which expired at the end of 2005, and have proposed increasing the allowable deduction to \$12,000. In the 2003 tax year, 7,970 Vermont students and families benefited from the tuition tax deduction.<sup>17</sup>

## A NEW DIRECTION FOR AMERICA

### Bush Republicans Take Us in the Wrong Direction, Virginia Students Pay the Price

Despite the critical need to boost affordable college opportunities for all Americans, the Republican-led Congress continues to put college even further out of reach for millions of students. Each year millions of hardworking American families and students continue to struggle to cover college costs. But five years of Republican policies have resulted in stagnant federal grant aid, increasing numbers of students and their families falling further into debt to finance a college education, and fewer options for college graduates.

**The Cost of College Has Soared.** Between the 2000-2001 and 2004-2005 school years, the cost of attendance at four-year public colleges in Virginia increased 33%, from \$8,744 to \$11,616 for tuition, fees, room and board. The cost of attendance at four-year private colleges in Virginia increased 24% from \$18,700 to \$23,277 for tuition, fees, room and board.<sup>1</sup>

**Median Family Incomes Have Remained Stagnant.** While public college costs have increased 33%, median family incomes in Virginia have increased only 9% since 2000.<sup>2</sup> After financial aid is taken into account, 26% of the average family income in Virginia is needed to pay for tuition at a four-year public college.<sup>3</sup>
